trod. and notes by Edward Gaylord Bourne. (Am. explorers ser.) 2v D xl,254;x,229p $3 '22 Allerton bk. (corr pub) A23-2050
"As the explorer of New France, the founder of Quebec, the discoverer of Lake Champlain, and for one critical period the Governor of New France, Champlain's figure looms large in the 17th century history of North America. The commission of geographer which was given Champlain by Henry IV, in 1603, led him to keep full notes of his voyages and travels, and the narratives of his explorations are a source of the first importance for the early history of Canada, New York and New England. He was the first to explore carefully and to describe with accuracy the New England coast as far south as Buzzard's Bay, the upper St Lawrence, Lake Champlain, the Ottawa, Georgian Bay, the Muskoko Lakes region, Lake Ontario and part of central New York. The original editions of his voyages are very rare and expensive, and appeared between the years 1604 and 1632."—Prof. Edward Gaylord Bourne.—Adv.

World crisis, 1911-1914, 1915. 2v O xii,589;xii, 578p ea $6.50 '23 Scribner [ea 30s T. Butterworth] (23-7252)
Winston Churchill, first lord of the admiralty, 1911-15, begins with the deadlock that existed between the combatants in the West at the opening of 1915, and carries the reader through a brilliant narrative of the events of this crucial year. Chapter titles include The search for a naval offensive, The origin of tanks and smoke. Written in a style similar to The world crisis 1911-14 which drew marked attention to both sides of the Atlantic. "It has a masterly ring of style. The candor of it is brave. Its revelations are copious. Well primed with personal documents, letters, telegrams, interviews and intimate communications, it is bound to cause explosions. Winston Churchill has never held back his opinions. An autocrat, born and bred he is interested only in great persons, great issues, great events."—From an editorial in the N.Y. Times.—Adv.

**Colden, Cadwallader,** 1688-1776
History of the five Indian nations of Canada which are dependent on the province of New York, and are a barrier between the English and the French in that part of the world; with an introd. by Robert Waite. (Am. explorers ser.) 2v D lvi,264;387p $3 '22 Allerton bk. (corr pub) A23-2051

Written to lay more completely before the public the importance of the Five Nations, or Iroquois, to the colony of New York as a barrier against the French and a means of controlling the West.

The first historical work written by an American; one which long since has taken rank as an historical classic, and one that must always remain the foundation for all literature relating to the powerful and important Iroquois or Five Nations of New York and Canada.

Colden became surveyor-general of the province of New York in 1718. A few years later he visited and studied the Mohawks and was adopted into their tribe. His inclinations and his official life both led toward a study of Indian life, which had most important and enduring results. The History of the Five Indian Nations contains accounts of their religion, manners, customs, laws and forms of government, their battles and treaties with the European nations; relations of their wars with other Indians; also political considerations, intrigues of the French, etc., which were of great significance to the American colonies and far-reaching in their results.

The original edition of the work was printed by W. Bradford in 1727. Copies are valued at $2,500.00, but very few being now in existence.—Adv.

The views of the President upon the fundamental problems confronting this nation are plainly revealed in these selected speeches. Some of them are historical, some biographical, some deal entirely with political principles, and some deal with the problems of education. Each one, whatever the occasion, is the medium for impressing, in words and manner notable for simple strength, the author's conceptions of our national principles.—Adv.

Problems in marketing. 2d ed O xix,803p $5 '23 Shaw, A. W. 23-11139

This book furnishes for analysis and decision a collection of carefully-chosen marketing problems in the actual form in which they have come before business men. A majority of the problems relate to questions which have arisen during the last three years. Moreover, each problem is stated in enough detail and with the necessary facts to develop the power of analysis and intelligent conclusion. The problems include a wide assortment of vital topics: substitution, exclusive agency, style risk, costs of doing a retail and wholesale business, mark-up, mail-order business, chain stores, liquidation of inventories, and so on.—Adv.

Journey of Coronado, 1540-1542; from the city of Mexico to the Grand canon of the Colorado and the buffalo plains of Texas, Kansas and Nebraska as told by himself and his followers; tr. and ed., with an introd. by George Parker Winship. (Am. explorers ser.) D xxxiv,251p $1.50 '22 Allerton bk. A23-2057
Published by A. S. Barnes & co., N.Y., 1904, in the series called The trail makers
"The most valuable contribution to the history of the most noteworthy exploring expedition that ever journeyed within the limits of the United States. Coronado set out from the city of Mexico with an enormous retinue, exploring the region as far as eastern Kansas, conquering the seven cities of Cibola occupied by the Zunis, visiting the Moki country, the Grand Canyon of the Colorado, the Pueblos of the Rio Grande, and the vast buffalo plains. There is an historical introduction that displays Mr Winship's great knowledge of the expedition and its causes and results."—Frederick W. Hodge, author of the Handbook of American Indians.—Adv.

Outline of genetics; with special reference to plant material. D vii,211p il $1.50 '23 Univ. of Chicago press [7s 6d Cambridge univ. press] 23-7782
Probably no phase of science has ever developed more rapidly than has the subject of genetics during the last decade. New plates, new subject-matter, and a new point of attack have brought this published work into line with current experimentation which is so essentially fluent. The text is intended as a preparation for dealing with the general literature of plant genetics, and is well adapted to the needs of botany students, both beginning and advanced.—Adv.

(ed.) Journeys of Réné Robert Cavelier, sieur de La Salle; as related by his faithful lieutenant Henri de Tonty, his missionary colleagues, Fathers Zenobius Membré, Louis Hennepin and Anastasius Douay, his early biographer, Father Christian Le Clercq, his trusted subordinate, Henri Joutel, and his brother Jean Cavelier, together with memoirs, commissions, etc.; ed. with an introduction. (Am. explorers ser.) 2v xxix,298; vi,259p $3 '22 Allerton bk. (corr pub) A23-2052

The complete story of La Salle's eventful and dramatic career forms the most striking chapter of French exploration of North America. The original narratives of Tonty and others which have been practically inaccessible are presented here under Prof. Cox's careful editorship. They are of intense interest as stories of thrilling adventure and of peculiar consequence, showing as they do, the origin of the French claim to the Mississippi Valley.—Adv.

**Damrosch, Walter Johannes,** 1862-
My musical life. O viii,376p il $4 '23 Scribner [18s Allen & U.] 23-14574
When Mr Damrosch, conductor of the New York symphony orchestra, describes his life he throws light on the musical developments in America in the past fifty years, and introduces famous musical celebrities, revealing their personal characteristics in a wealth of incident and anecdote. His autobiography opens with his life in Germany, whence he followed his father to America, there to watch the introduction of German opera into the Metropolitan, and the founding of symphony and oratorio societies. He describes his experiences as director of the Damrosch opera company, and as organizer, during the war, of the military musical activities. Chapter titles include Lilli Lehmann, Andrew Carnegie and the Blaine family and Women in musical affairs.—Adv.

**De Forest, Marian**
Little women; a comedy in four acts; adapted from the story by Louisa M. Alcott, by arrangement with Jessie Bonstelle. D 142p il pa 75c '21 French, S. 21-16326
The most successful version of Louisa M. Alcott's celebrated story, used for the William A. Brady production in New York and on tour throughout the country. All the characters of the novel are incorporated in this delightful play and the plot followed with scrupulous care. A favorite play with schools and dramatic clubs and especially recommended by principals and superintendents (5 males, 7 females).—Adv.

Government in Illinois. D xix,479p il $3 '23 Univ. of Chicago press [15s Cambridge univ. press] 23-8785

How does our government affect each of us? In what way do the national, state, and local institutions in turn concern our individual lives? To answer these questions Mr and Mrs Dodd have written Government in Illinois. A judicious use of charts provides a visual representation of government and its functions that will be of considerable value to the reader, whether he be a student of civics or a voter concerned with the intricacies of his duties and privileges of self-government.—Adv.

The author is a professor in Harvard university; acting chief of the statistics division of the United States food administration in 1918. A startling prospect—the world grappling with starvation—is suggested in this volume by an expert in biological and economic subjects, who has brought to bear on his conclusions the most recent statistics available in these two fields. He presents a picture of the world situation today as regards population and agricultural resources, pointing out that if present conditions continue each country will soon have to live on its own farm products, and disaster will result. He analyzes the world's production areas, reaching conclusions that are as convincing as they are arresting.—Adv.

**Edar,** pseud. See Anthony, E:

**Edda Sæmundar**

Poetic Edda; tr. from the Icelandic with an introd. and notes, by Henry Adams Bellows. (Scandinavian classics, v. 21, 22) 2v in 1 D 624p $4 '23 Am.-Scandinavian foundation 23-16414

The Poetic Edda is one of the greatest literary treasures preserved to us from the period before the pen and the printing press. In the dim centuries of the past men conceived these tales. They were passed by word of mouth from man to man, and finally they were written down; they were lost, and found again by scholars whose long years of labor have restored them. This is the first adequate edition made accessible to English readers.—Adv.

Experimental wireless stations; their theory, design, construction and operation, including wireless telephony, vacuum tube and quenched spark systems; a complete elementary course of instruction in and on account of sharply tuned modern wireless installations; new 1922 ed. a new book from cover to cover with entirely new engravings; rev., enl. and reset ed., showing all recent improvements. D x,11-392p $3 '22 Henley 22-10485

This book tells not only how to make apparatus to hear all telephoned and telegraphed radio messages, but also how to make simple equipment that works for transmission over reasonably long distances. There is a host of new information included. The first and only book to give you all the recent important radio improvements, some of which have never before been published. This volume anticipates every need of the reader who wants the gist of the art, its principles, simplified calculations, apparatus dimensions, the understandable directions for efficient operation. Vacuum tube circuits; amplifiers; long-distance sets; loop, coil and underground receivers; tables of wave-lengths, capacity, inductance; such are a few of the subjects presented in detail that satisfies. It is independent and one of the few that describe all modern systems.—Adv.

Mrs Eliot's fairy stories have a unique place in literature for children. Charming in style, they are wonderfully beautiful and rare in their understanding of the child's heart and mind.

In The house on the edge of things the young imagination is caught by their witchery and the child finds himself at play with the fairies of the rain, stars, wind, and sea.

The line and color drawings by Frances Eliot Fremont Smith admirably supplement the stories and make this a truly wonderful book for children.—Adv.

Concrete programs and methods used in furthering the interest of employees in the work of the employer, garnered from investigation among one thousand concerns, affords ample material for executives to adapt practical suggestions outlined to the conditions of their plants. Types of wage systems, piece- and day- and week-work, bonus systems, thrift plans, profitsharing, stock participation plans, mutual benefit associations and pension systems besides methods of compensation for retail stores, salesmen, office workers, foremen and executives are discussed. A comprehensive bibliography is included.—Adv.
